MegaMax

SOLUTION FOR SUMMER GRAZING EFFICIENCY

MegaMax, the palatable, molassed summer grazing lick from Scotmin Nutrition is the ideal supplement:

- Convenient and cost-effective.
- Available with and without copper for cattle or sheep.
- Contains 14% Protein (including 5% from urea).
- Full balance of trace minerals and vitamin E.
- Protected Zinc and Copper.
- Garlic incorporated to reduce nuisance flies.
- Livestock have access 24/7.

MegaMax will help keep suckler cows and ewes in good body condition, keep beef cattle growing and keep lambs finishing.

Contact your representative to discuss this season's **MegaMax** promotion.

- combination of bioavailable and chelated trace elements, vitamins and amino acids
- designed to maximize performance in lambs
- provides immediate and long term supplementation

Product Review...

Sandy Patterson,
Abercairny Estates,
Creiff

*"we have been using power drench sheep plus for our lambs over the last two years. I haven't seen our lambs look so well and they are finishing better at a fraction of the cost.
The results are outstanding"*

NORTHSHEEP 2011

I was brought up on the family farm at Drumtee, Fenwick, where we continue to farm 100 suckler cows and 800 sheep. The family also have a dairy unit milking 130 cows at Nether Enoch Farm, Eaglesham. After gaining 5 highers from Loudoun Academy, I went to Auchincruive to study Agriculture and after 2 years left with and HND in Agriculture with Merit. I am past Crossroads young farmers chairman who enjoyed taking part in all manner of activities from stockjudging and cattle dressing to concerts and speechmaking.

When I started with the company 3 years ago, I spent the first 9 months working in our production mill, seeing how products were made and what was going into them. After that I took over from a retiring sales rep in the North Ayrshire and Renfrewshire area. Its a great area to work in with some very interesting characters. One interesting product I have been selling recently is **Power Drench Pre Lac**. One of my customers had problems with calves being born and being slow and lazy at getting up. I recommended he tried **Power Drench** and after speaking to him recently he has been raving that calves have never been sprightlier than this year. They are getting up quickly, suckling and pushing on from there.

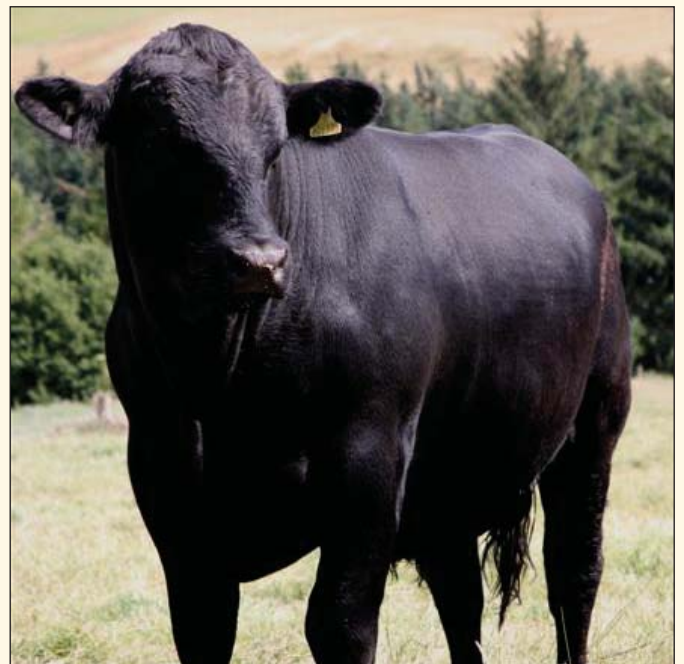

Another product Im enjoying selling at the moment is **Mega Max**, a great booster for cattle and sheep at this time of year where stock, especially young stock, can be neglected at grass. The right blend of proteins and energy, mixed with high quality minerals means that is perfect for complementing grass at this time of year.

Focus on... SuperCOD

A product with pedigree –traditional formulation favoured by discerning stockmen for over 8 decades, rich in cod liver oil and omega 3 fatty acids imparting a shiny coat and supple skin on all stock. Especially beneficial for young stock and all showing animals

- ✂ Combination of 15% Cod Liver Oil and Scottish Salmon Oil provides generous level of omega-3 and omega-6 oils for a brilliant shine
- ✂ Can be incorporated into cereal mixes, TMR or top dressed
- ✂ Careful balance of essential nutrients for skin and coat condition
- ✂ Suitable for sheep, cattle, and horses
