Main Story

Scotmin Nutrition sponsor SAYFC East Cabaret and Talent Spot

The team at Scotmin Nutrition are delighted to once again support SAYFC West Region Talent Spot and East Region Cabaret.

"After the success of last year's events, we were all too happy to be able to lend our support in 2019. Sponsoring the events gives us a fantastic opportunity to give back to the agri-community and support young farmers who are so vital to the future of agriculture."

Last month East Cabaret Final saw East Fife

JAC take home the win after performing their convent parody "Bad Habits". The performance saw the cast dawn on their robes and head to ITV studios to audition for Britain's Got talent in order to live their singing dreams.

The West Regional Talent Spot will be held on Saturday 23rd March 2019 at the SEC Armadillo, Glasgow with the first performance starting at 7.00pm (doors open 6.00pm).

Tickets are priced at £16 and are available from www.shop.sayfc.org

Buy 10 Get 1 Free:

Megalix Quattro Mag Cattle

Megalix Quattro Mag Sheep

Megalix tubs are widely regarded as the highest quality molasses mineral tubs on the market, providing bio-available minerals, trace elements and vitamins 24 hours a day.

This spring Megalix Quattro Mag and Megalix Quattro Mag Sheep are available with buy 10

get 1 free. Megalix Quattro Mag contains 4 sources of magnesium, combining two quickly available sources with two slowly released sources giving livestock the ultimate protection against grass staggers. Megalix Quattro Mag Sheep comes with no added copper, making it ideal for mixed grazing systems. ■

New From Scotmin: Megasile

Silage additives Special offer:

£1 per treated tonne

Megasile and Megasile HDM are the latest innovations from Scotmin Nutrition. The two multi-strain forage ensiling additives are specially designed to increase the speed of silage fermentation, ensuring that optimal nutritional values are preserved.

Suitability	Megasile	Megasile HDM
Grass <30% DM	x	
Clover grass mix >30% DM		x
Grass >30% DM high sugar content		x
Maize		x
Cereals whole crop		x
Alfalfa/Lucerne	x	

Megasile Benefits

- Faster fermentation (pH drop)
 - Achieving a stable silage more quickly
- Reduce DM and protein losses
 - Preserving more nutrition in the silage
- Increase silage energy, digestibility and palatability
- Increases silage intakes for improved animal performance
- Application Rate: 1.5g/tonne

Megasile HDM Benefits

- Rapid and sustained pH drop to preserve the nutrients in the silage
- Reduces yeast and mould growth after clamp opening
- Increases aerobic stability - Silage stays palatable for longer after feedout
- Application Rate: 1.5g/tonne
