FARM SHIELD

FarmShield is a non-toxic hygiene powder for pens, cubicles, stables, calf hutches and box floors. Containing a unique formulation, FarmShield is designed to absorb moisture from livestock bedding, creating a healthier environment for animals to prosper.

FarmShield is pH neutral and non-abrasive to animals' skin or surrounding fixtures and fittings. The drier environment lessens smells and odours related to ammonia and reduces the opportunity for maggots or larvae to spread, altogether ensuring a significant reduction of infection related illnesses.

Research carried out at AGROLAB (Denmark) confirms that FarmShield effectively reduces bacterial and fungal spores often found in wet bedding, with research conducted by Biocide reporting up to a 98.4% reduction in bacteria.

- **Reduces bacteria and fungal spores**
- **Contains newly developed active substance**
- **Effectively dries floors**
- **Covers large areas without becoming lumpy**
- **Minimal dust**
- **Reduces fly larvae**
- **Reduces ammonia**
- **Non-abrasive to fixtures and floors**
- **Improves stock hygiene**

For: All classes of livestock

Treats: 50g treats 1m²

Available in: 25kg

Application:

One bag (25kg) of FarmShield covers 500m², application three times per week at a rate of 50g per m² is all that's needed to maintain a healthy stable climate.
